

# Protest Is Not Enough

*WeResistNow.org*

---

Fascism is here in America. Our President is defying court orders, attacking free speech rights, erasing minorities from public life, dictating our culture, violating congressional mandates, and more.

Protest is good. We need to put pressure on our legislators to take action and raise public awareness, but Republicans have full control of our Federal Government, and the long established checks-and-balances are failing to reign in Trump's abuse of power.

Resisting Fascism requires political action, mutual aid, and regular people just **doing the right thing** at their jobs - Teachers refusing to suppress history, cops refusing to conduct unconstitutional or unjust arrests, lawyers refusing to start sham prosecutions, troops refusing to turn against citizens, ICE agents resigning when ordered to unlawfully deport green card carrying citizens, government workers blowing the whistle, and workers in all industries organizing.

Talk to your coworkers about starting an anti-fascist working group. If you're in a union, work with your union leadership. Put pressure on your company to stand against fascism, and be ready to strike

if they don't. Work with other unions in your area to do the same.

Protest more, not just on organized days. Go stand on a busy street corner with a sign, get your friends to join you or do it alone. Spread fliers like these. Organize with your friends. Advocate with local organizations, local government bodies, and even local Republicans.

Talk to your friends who are police or military about where they draw their line, and when they'll refuse unjust or illegal orders. Talk to your teacher friends about teaching the truth, and discuss where they draw their line. Will they resign if ordered not to teach about black history? Will they resign if ordered to misinform their students about intersex biology?

Learn about the fascist acts our federal government is taking, so you can educate others who are reluctant to believe you. Talk to your friends and family, and call this **fascism**.

And do Mutual Aid. Grow and give away food. Provide services within your profession or skillset to friends and neighbors who need them, especially those who can't afford it. Provide housing. Teach kids in your neighborhood. Organize community events.
